

## SENGS SUBSEA ENGINEERING SOLUTIONS LTD

SengS Subsea Engineering Solutions Ltd is an independent engineering company founding in 2012 which provides engineering design, consultancy, IRM project support, testing & flushing, subsea tooling and repair & refurbishment of subsea and topside applications.

### Challenges:

- Manufacture two-off stainless steel framed tanks.
- Utilize stainless and carbon steel fabrication capability.
- Extremely challenging deadline of 2-3 weeks each.

### Delivery outputs:

- Woollard & Henry reacted quickly with focus on delivering quality products, right first time, to the very tight deadline.
- Stainless steel fabrication.
- Carbon steel fabrication.

## CUSTOMER IMPACT

---

“Over the past year Woollard & Henry have been exceptional in their quality and delivery especially with the extremely tight deadlines due to the type of work scopes SengS constantly undertake.

For example SengS awarded W&H the fabrication of 4-off umbilical winch reels which had a deadline of 6 weeks. This type of work scope normally takes 12 weeks.”

MURRAY KERR  
Managing Director, SengS Subsea Engineering Solutions Ltd.
