Modular Dandy System

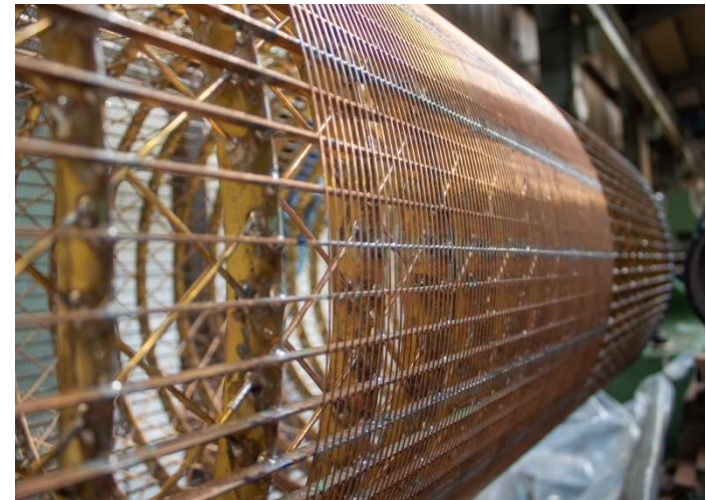

<0.2m to 2m
Diameter Systems

VISIT US WOOLLARDANDHENRY.COM

Why Our Dandy Systems

- Reinforced design leading to the most robust and accurate dandy rolls on the market today.
- Large thermal designed heated tray within dandy to catch water drops
- Quick release cleaning shower, with repeatable replacement.
- Accurate penetration control giving optimum running conditions.
- All trays have a steam heated base to eliminate drops.
- Bespoke design specifications to suit the mill not W&H.
- After sales support

Modular Dandy System

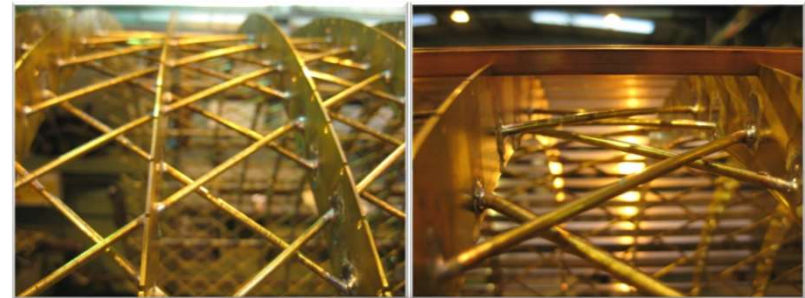

- Open design ensures
- no pulp build up within hoods or overhanging save-all trays.
- Easy Cleaning of system without opening system up.

Open Design Dandy

- Double geodetically round wires ensure exceptionally robust dandy rolls and openness for cleaning.
- Top bars set into the notched helical gives added strength and allows for extremely accurate finishes in both linear and circumferential dimensions

Covers to Suit

- Hand seamed or welded edges ensuring no seam marking on paper grades down to 17gsm.
- We also offer polished stainless steel covers reducing the throw on grades such as cigarette paper.
- Chain Laid Cover – Phosphor Bronze/StainlessSteel.

Cleaning System

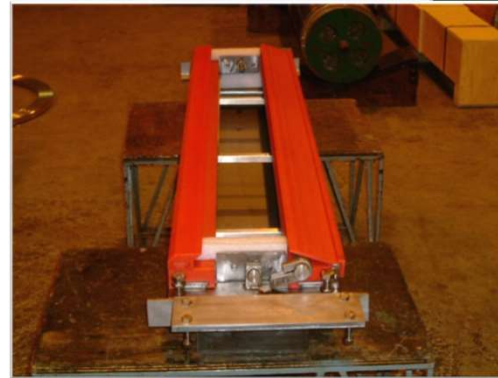

- Fully integrated cleaning system with either pneumatic or electromechanical oscillation. (pneumatic shown)
- Water shower, also with a steam heated catch tray, quick release couplings and separate steam shower ensuring dispersal of any air bells.
- Thermal heating technology taken from experience with our AccuSteams™
